

Vinyl Privacy Gates & Bends

Poly Vinyl Creations is not just another vinyl fence fabricator. Poly Vinyl Creations offers total customization for your needs and desires. Either for residential or commercial fencing, no one offers more for your total satisfaction with styles and colors that meet or exceed your taste and desire.

- All bends from 1'-2' S-Bends, 6" Concave/Convex, or Corner Radius Bends are manufactured using a heat process at our corporate facility.
- Gates are offered as Welded PVC, Riveted PVC, or with an Internal or External Aluminum Frame.
- Gate Leafs are manufactured up to 10' wide.
- For added rigidity, use a 4" 11-13 gauge steel post inside your pvc post or a powder coated steel post on internal or external gate frame leafs that are over 6' wide.
- For Dumpster Enclosures, we recommend 2 drop rods per DDG and an external frame when using vinyl. Dumpster gates get a lot of work and must be secured.

- Below is a sample corner picture of a welded privacy gate. All of our vinyl welded gates go through a 3 part system: 45 degree corner, welding process and cleaning process to insure an accurate and strong vinyl weld that will withstand the test of time.
